### Custom Protein Purification in the *E. coli* Expression System

Cat#	Step charges with description	Price
CS1-1	Cloning a gene of interest into our vector or the vector of your choice: -Gene synthesis with codon optimization or PCR cloning -Sequencing verification for the cloned gene - <i>E. coli</i> Transformation -Small scale over-expression of target protein to check the expression level	\$600*
CS1-2	Large-scale protein purification from 1 L of <i>E. coli</i> culture	\$1900
	Total cost from a gene sequence to protein	\$2500

\*For genes larger than 1.2 kb, the gene cloning price will be slightly higher.

To place the order, please contact us:

\*Get order form from our web site [www.enzymax.net](http://www.enzymax.net).

\*Phone 1-859-219-8482, or leave a message at 1-859-552-3440, Fax: 859-219-0653

\*E-mail [info@enzymax.net](mailto:info@enzymax.net)
