

Gluconic acid solution

ITEMS	STANDARD
Description	Colorless or light yellow transparent, thick liquid
Assay,%	50.0 – 52.0
Arsenic,ppm	1max
Heavy metals,%	0.002max
Sucrose or reducing	Negative
Calcium experiments	Negative
Chloride,%	0.035max
Sulfate,%	0.024max
Conclusion Compiles with the requirements of JSFA V II	

Chemical Name: Gluconic Acid Solution

CAS: 526-95-4

Specification: Food Grade

Properties: Clear to light brown liquid

Applications: Chelating agents, in the formulation of pharmaceuticals, foods, and cosmetics as mineral supplements, used in the formulation of pharmaceuticals, foods, and cosmetics as mineral supplements to prevent the deficiency and as buffer salts. They are used as ingredients in various hygienic products. In industrial applications, they are used for scale removal in metal cleanings, industrial and household cleaning compounds including mouth washer, metal finishing, water treatments, and as paper and textile auxiliaries.

Package: 250kg/Drum.
